

Exam evaluation with the Examiner2

The test statistical analysis of items has become an integral part of the exam quality management. Examiner2 is UCAN's powerhouse for the automatic statistical analysis of items & exams and for the calculation of test scores.

Test statistics and scoring

-  Automatic calculation of **difficulty, discriminatory power, index of discrimination, Cronbach's Alpha** etc.
-  **Direct feedback** on items with conspicuous test-statistical results.
-  Option to **export the data to the item management platform IMS** for quality assurance.
-  **Automatic calculation of test results and scores** with variable evaluation algorithms.

Further features

- Seamless integration** (import) with prevalent exam tools like EDGAR, EvaSys, Campus.
- Evaluation by arbitrary**, user-defined attributes of participants.
- Multi-user support.**
- Export of exam data** into a PDF report or to a excel file.
- Examiner2 is free of charge for our Partners.***
