

Item and Exam Management with the IMS

The ItemManagementSystem (IMS) is the backbone of the UCAN toolbox. Create, manage, share and review your items, then deliver them on paper sheets, desktop computers or tablets. Concentrate on writing good content - and let the IMS do the rest for you!

Overview

The **web-based item and exam management tool** supports you throughout the entire exam process - from the creation of an item over the delivery all the way to the post-review.

Personal account customization, advanced search and drag & drop functionality make the IMS a powerful, **easy-to-use personal exam assistant**.

The IMS is one of the **world's leading item and exam management platforms** trusted by more than 62 partners from 7 countries.

Features

-  Customizable **multi-classification system**
-  Integration of **pictures, audio files and videos** from your personal media library
-  **Easy export of exams** for delivery on scanner sheets, desktop computers and tablets
-  Support of all common **item and exam types** (MCQ, OSCE, orals)

Quality assurance

- Customizable review system** integrated
- Group/single **post-review function** for enhanced quality management
- Test-statistical analysis** of items and exams for quality improvement
- Automatic permutations** of questions and answers to prevent cheating
- Blueprinting** for the creation of good, reliable exams
